Dave **Scott**

Machine Learning Engineer · Data Scientist

Zijing Apartment 20, Tsinghua University, Beijing 100084, P. R. China

(+86) 135-5220-1174 | davejscott@shaw.ca | davejscott | davejscott

Education

University of Alberta — *Edmonton, Canada*

M.Sc. in Computer Process Control Engineering · GPA **3.8**/4.0 — *Sep. 2017 - Current*

- Recieved **Alexander Graham Bell Canada Graduate Scholarship** – the **highest** level of scholarship for a Canadian Master's Scholar, **14 additional Awards** relating to Research in Machine Learning, Leadership and Mentorship

University of Alberta — *Edmonton, Canada*

B.Sc. in Chemical Engineering, Co-op Program · GPA **3.7**/4.0 — *Sep. 2012 - Apr. 2017*

- **Capstone** Design Project, **1st Place**, **8 additional Awards** relating to Written and Oral Communication, Leadership, Academic Achievement

Summary

Driven and results-oriented M'Sc. Candidate graduating Fall 2019 with a keen interest in data science and machine learning. Deep expertise in developing machine learning algorithms for time-series applications that are utilized in industrial processes. An effective solutions-oriented developer, utilizing Python, RStudio, MATLAB, and TensorFlow. More than 2 years of work experience in adaptive and agile environments creating innovative applications for software engineering, with Computer Vision, AI, Natural Language Processing, and Deep Learning experience.

Experience

Tsinghua University — *Beijing, China*

Machine Learning Research Engineer - Master's Exchange — *Feb. 2019 - Current*

- Identified a previously unsolved data science problem for Slow Feature Analysis (SFA) ML algorithm in which it was uncapable of utilizing non-stationary time series data to generate insights from processes that suffer from not having a constant mean and variance.
- Programmed fully automated modelling and process monitoring pipelines (Scikit-learn, Tensorflow, MATLAB), including backpropagation algorithms and intelligent algorithm initialization.
- Solved problem by developing a first-of-its-kind Probabilistic SFA ML Algorithm that utilizes both non-stationary and stationary process data for industrial process monitoring (MATLAB, Python), identifying process faults 20% faster and raising 35% less false alarms when compared with the Principal Component Analysis (PCA) ML algorithm.

University of Alberta — *Edmonton, Canada*

Computer & Machine Learning Research Engineer — *Sep. 2018 - Feb. 2019*

- Re-engineered Pump Fault Analysis Software (Python) by creating a GUI for end-user to interact with software and identify faults.
- Implemented data mining and machine learning program (Python, C++) for a Cloud Control System that contained 5000 variables.

Schlumberger Limited — *Tulsa, USA & Calgary, Canada*

Data Analytics Field Engineer, Intern — *Jun. 2018 - Jul. 2018*

- Developed ML solution that used real-time vibration and GPS data to detect 10 drilling faults, ensuring efficient operations and protecting assets.
- Formulated and launched IoT program that connected microprocessors to satellites, improving IoT links and saving $100,000 USD in lost time.

Canadian Natural Resources Limited — *Calgary, Canada*

Data Science & Controls Engineer, Co-op Student — *May. 2016 - Dec. 2016*

- Forecasted and modeled capital expenditures of 80 capital projects into models and graphs (R & SQL), delivering KPIs to senior management.
- Initiated and programmed Project Capital Expenditures Software (VBA), streamlining required time to update capital expenditures by over 30%.

Hackathons and Data Science Competitions

2019 **1st Place,** Tsinghua University and UNSW Data Science Competition — *Beijing, China*

2019 **1st Place,** Tsinghua University ARM Internet of Things (IoT) Hackathon — *Beijing, China*

Interesting Experiences

Rapid Fire Controller e-Commerce Business — *Edmonton, Canada*

Co-founder — *April 2009*

- When I was 13, I started my first eCommerce business utilizing soldering, circuitry, and electrical engineering principles. I modified Xbox 360 hardware on each controller that made players more competitive than their peers. Finally, I sold my products on eBay, grossing over $5,000 dollars USD in sales in one year.
